#### "Polish Literature and Its Languages"

When compared to multilingual and multicultural world literatures, the istatus of Padioh Interature seems easily defined: it is written in one language and, for the most part, in one country. Yet Poland has always and bicultural writers who have used Polish locather with an other language, or even two, in their writings. Investigating these meaningful sceptions can be illuminating— it introduces foreignets to a "inno" Horotaty what was at

time composed in "maper languages such as Prenchs English German, Rissian, Indhuman and Shunish, not io mention the once universal Latin. Poland itself has a lesser known multicultural and multilingual parts in which languages such as 'Woldh and Lithumain serve premiment during the early to late modern periods. In examining receives werks recognosed by Polish andhers written in a language other than Polish, Marta Slewars will challenge the polism that 'Polish iterature is a munced national frequence.
